

Rconnect is our latest innovation tool, developed to provide usage and performance data enabling our customers to meet Industry 4.0 demands.

The future of manufacturing is changing; factories need to be smart and machines need to be smarter. Rconnect does just that, by putting performance monitoring & optimization at your fingertips, enabling agility, flexibility and speed to exceed production standards.

Rconnect drastically reduces downtime by giving you informational transparency. With knowing the who, what, where, when, why, and how about your machines you're empowered with actionable insight to continuously improve automation.

Rconnect provides these must haves to enable your growth in the market:

- ✓ **Innovation**
- ✓ **Operational Scalability**
- ✓ **Security & Control**
- ✓ **Visibility**

**Are your machines prepared for the journey into Industry 4.0?
Get there with ROBOPAC Rconnect.**

Advantages

- ✓ **Remote Monitoring**
- ✓ **Downtime Reduction**
- ✓ **Improved Optimization**
- ✓ **Predictive Maintenance**
- ✓ **Usage Statistics**
