R-connect

Rconnect is a system for **controlling, collecting, processing** and **filing** large amounts of **data from installed machines.** Through a dedicated access-controlled portal, accessible from PCs or any portable device, you can connect to all machines equipped with the Rconnect system and **monitor their performance 24/7**.

R connect TECHNOLOGY

BE THERE, WITHOUT BEING THERE

DIAGNOSTIC ABILITY TO ALERT YOU
for preventative maintenance, emergency stops, and trigger alarms

MONITOR FILM CONSUMPTION
Trigger a minimum order point and alerts you based on your current supplier lead time for film.

"We love Rconnect because **WE DON'T HAVE TO USE OUR ORGANIZATIONS EXISTING NETWORK.** It utilizes the cloud via sim card preventing security issues."

Rconnect also allows you to make machine cycle improvements and provide remote assistance with direct connection to the Robopac Authorized Service with the ability to open ticket intervention.

The system is also set to automatically generate alarms in case of problems or scheduled maintenance. Rconnect also allows fleet control and management, for those with multiple stretch wrappers.

Stretch Wrappers • Packers • Palletizers • Case Equipment • LGV
