

Stainless Steel Rotoplat SEMI-AUTOMATIC STRETCH WRAPPER

Ideal for processing, wet or cold operations the Stainless Steel Rotoplat 708 stretch wrapper is a fully stainless machine. Imitators use a stainless coating. Why is this important? Because water builds up at the base and will corrode anything ferrous.

Performance features:

STAINLESS STEEL CONTROL PANEL

The high performance 7-inch color touch screen with icons specifically designed and created by Robopac has led to the implementation of the MULTILEVEL CONTROL function.

STAINLESS STEEL FILM CARRIAGE

Features an S Winding
Pattern Roll Carriage for easy
loading that provides 40%
more film contact than the W
Winding pattern (commonly
used by competitors) to
provide better control of film
through the roll carriage and
fewer film breaks.

STAINLESS STEEL HD TURNTABLE

Supported by 28 heavy duty casters and can handle loads up to 4,400 lbs. Weight capacity increases to 5,500 lbs by simply adding 16 casters. This can be done at order entry or added later in the field.

Rotoplat 708 Specifications

Performance Criteria

Production Speed:

Up to 40 LPH

Turntable Speed:

5 – 12 RPM

Turntable Drive:

1 HP VAC

Load Handling System

Turntable Size:

65" Diameter

Maximum Load Height:

110"

Maximum Load Weight:

4400 lbs.

Film Delivery System

Containment Force: Multi-Level Variable

• Film Carriage Motor: 1/2 HP VAC

Height Sensing: Automatic via photocell

Film Threading: Patented S-Pattern

Corner Compensation: Load Cell

Safety Features

Anti-fall device on carriage

Pressure activated safety stop on carriage

CE Compliant, UL, CUL

Utilities

Voltage:

115V, 20 amps, 60 Hz, 1 PH

Warranty:

3 Years
